

SAFEWAY, INC.

Store locations in the U.S. and Canada

Safeway, Inc. commits to greening its portfolio of new and renovated retail stores.

In 2007, Safeway contracted NORESKO to develop a corporate LEED® certification program for its portfolio of retail stores in the United States and Canada. Safeway stores share multiple design elements, NORESKO sought opportunities to streamline the LEED certification process across similar buildings.

NORESKO worked closely with Safeway's internal design and green building staff to develop the Safeway LEED certification program. The program is a customized set of processes and tools created to streamline the design, construction, and LEED application process for all new and existing stores pursuing LEED certification.

NORESKO performed a thorough analysis to identify which LEED elements to design into the corporate prototype and which to design based on a store's site-specific conditions. The final program documents include training criteria, templates, tracking lists, timelines, and responsibility matrixes tailored to Safeway's sustainability goals and unique prototype design. All program tools are used by Safeway, Inc. Retail Divisions for implementation at the store level.

After developing Safeway's corporate LEED certification program, NORESKO has continued to provide LEED certification consulting on individual stores in the U.S. and Canada. In 2010, the first Safeway store in the program received LEED Gold. The store is Located in Santa Cruz, California.

LEED® and its related logo is a registered trademark owned by the U.S. Green Building Council® and is used with permission.

Certification Goal

- LEED Silver® (corporate minimum requirement)
LEED® for Schools™ v2.0

Services

- LEED certification program development
- LEED certification consulting
